Professional Summary

Motivated and detail-oriented Computer Science student with a strong foundation in software development, IT support, and client relations. Experienced in managing large-scale accounts and delivering high-impact solutions using modern technologies and methodologies. Actively pursuing CompTIA A+ certification with one exam completed and expected to earn a Bachelor's degree in December 2025. I'm excited to contribute to a dynamic IT or software development team to set roots with and grow together.

Education

Southern New Hampshire University

Bachelor of Science in Computer Science (In Progress), Expected December 2025

Associate of Science in Computer Science, October 2023, GPA: 3.78

Current GPA: 3.88

Certifications

Professional Experience

Account Manager – TBHC Delivers, LLC (09/2022 – 01/2025)

- Managed a multimillion-dollar portfolio of convenience store clients in the food industry.
- Boosted client repeat sales by over 5% annually through effective consultation and marketing strategies.
- Utilized data analytics and created written/graphical presentations to support client engagement.

Driver/Operator – PODS Moving and Storage (03/2021 – 09/2022)

- Safely operated CDL trucks for delivery and transportation of customer storage containers.
- Delivered high-quality customer service, including handling inbound calls and executing specific customer requests.

Account Manager – TBHC Delivers, LLC (05/2016 – 03/2021)

- Managed food service accounts, provided sales consultation, and supported client success initiatives.

Projects

- Full-Stack Animal Shelter Dashboard – MongoDB backend, Python Node, Dash web app; includes filtering, sorting, interactive maps, and breed data visualization.
- Systems Thinking Retail Analysis – Comprehensive feedback loop and bottleneck analysis for a retail/online order hybrid business.
- WeightTracker Mobile App – Android app for weight tracking (Java), includes data entry and graphical progress display (in development).
- Course Management System – C++ program for managing course data using hash tables. Implements a `Course` struct with course numbers, titles, and prerequisites. Includes course sorting, data loading, and menu-based interface (CS300: Database Design and Analysis).
