Scott Moore

Aspiring Software Engineer and Overall Tech Guy
Nashville Metropolitan Area

Summary

With years of experience in customer-focused roles, I've developed a strong ability to build relationships, foster trust, and contribute to both customer satisfaction and business success. Whether in sales, financial services, or commercial driving, I've always been the bridge between the company and its customers—ensuring a positive experience while driving results.

Beyond my professional experience, I've always had a deep interest in technology and problem-solving. I consider myself highly adaptable and tech-savvy, which led me to pursue my passion more formally. I'm currently working toward my Bachelor's in Computer Science (Software Engineering), set to graduate in December 2025. My goal is to transition into a software engineering role where I can apply my analytical skills, technical knowledge, and customer-oriented mindset to create innovative solutions.

With a diverse background in sales, finance, and logistics, I bring a unique perspective to software development—one that blends technical expertise with business acumen and strong interpersonal skills. As I work toward my degree, I remain eager to expand my skill set, connect with industry professionals, and embrace new opportunities in the tech world.
